Chemistry students!

Did you know that your school is signed up for the 2020 Chemistry Olympiad?

This competition gets you thinking creatively about the chemistry you know, and challenges you to test what you’ve learnt in real-world situations.

If you do well in the UK rounds, you might find yourself representing the UK in Istanbul next year!

“Helps a lot with problem solving questions in the A-level exam and is good to help recap topics.”

“…participating in such a competition opens your eyes to applications you wouldn’t normally consider and it looks fantastic on your UCAS forms.”

“Questions were fun, and the diagrams were phenomenal. I particularly enjoyed the bee one.”

Speak to your chemistry teacher to sign up
